Scalpel Handles and Blades

Double Edge Blade Handle

Mopec's double edge blade handle is ideal for trimming surgical specimens and is a versatile tool for any laboratory. The double edge blade is securely held in place, yet easy to replace. The pencil style handle provides a firm yet mobile grip. Double edge blades are sold 100 per package.

Stainless Steel Blade Remover

Made for the safe removal of scalpel blades from handles. Easy to use - just insert handle into the blade remover and while holding the remover's edges down, pull out the handle. It's that quick and easy. Made of stainless steel, the blade remover is also autoclavable.

Product No. AJ107

1. Insert blade and handle into blade remover

2. Holding blade remover firmly down, pull out handle.
